Education

September 2022 - June 2026

Future Talent Academy, Wollo Sefer, Ethiopia – High School Diploma

Expected: August 2026- May 2030

George Mason University, Fairfax, VA, USA – Candidate for Cybersecurity Engineering, Bachelor of Science

Relevant Courses – Nanodegree in Programming Fundamentals, Database Management & SQL, Python for Software Development, Scripting & Automation with Python, Web development with HTML, CSS & JavaScript

Experience

September 2024 - March 2026

Bookwise Accounting Solutions

VA, USA

Automation & AI Solutions Architect (Remote)

- Reduced client manual processing time by ~60% by architecting end-to-end automation pipelines using n8n and Zapier across accounts payable/receivable, payroll, bookkeeping, and financial reporting.
- Cut reconciliation errors by 40%+ by building REST API and ERP integrations connecting Google Sheets, Microsoft Excel, and QuickBooks into a unified, real-time data pipeline.
- Integrated OpenAI and Claude LLM APIs into live accounting workflows, enabling automated data extraction, transaction categorization, and anomaly detection for compliance and auditing.
- Deployed an AI-powered auditing solution that flagged financial discrepancies in real time, reducing manual audit review time significantly and improving accuracy.
- Designed and shipped RPA scripts that automated invoice processing, payroll runs, and compliance reporting, eliminating hours of weekly manual work.
- Mapped complex client accounting processes end-to-end and translated them into scalable automation architectures covering the full accounting cycle.

Web Design & Development Specialist (concurrent role)

- Designed and developed 3+ client-facing websites end-to-end, owning the full pipeline from Figma UI/UX design through front-end development and production deployment.
- Built responsive, mobile-first websites using HTML, CSS, and JavaScript; established design systems and style guides to ensure brand consistency across all web properties.
- Collaborated directly with clients through structured feedback cycles, consistently delivering on scope and timeline across the full project lifecycle.

June 2025 - February 2026

RAM Agricultural farming

ADD, ET

Website Development Specialist

- Built the company's entire web presence from scratch as sole developer — main website, product/service pages, and internal admin dashboard — in a single end-to-end engagement.
- Delivered a functional admin dashboard portal that digitized day-to-day internal operations for an early-stage agro-farming startup with no prior web presence.
- Designed the complete UI/UX in Figma (wireframes → high-fidelity mockups → prototypes), then developed pixel-perfect front-end code using HTML, CSS, and JavaScript.
- Worked directly with the founder and CEO to align site messaging with brand vision and investor-facing goals, managing the full pipeline from requirements through delivery.

April 2024 - January 2025

Wan Ofii Construction

ADD, ET

Web Design & Development Specialist

- Sole designer and developer; built the company's complete web presence from scratch including the main site and a project portfolio that helped establish credibility with new clients.
- Designed full UI/UX in Figma and developed a polished, professional website in HTML, CSS, and JavaScript — fully responsive and cross-browser compatible.
- Managed the entire project lifecycle independently from initial client brief through final delivery.

August 2023 - January 2024

Helping hands for the bright hands

ADD, ET

UI/UX Designer

- Designed the complete UI/UX for a charity organization's web presence — main website, donation pages, campaign pages, and volunteer portal — collaborating with a small design team.
- Created wireframes, user flows, and high-fidelity Figma mockups optimized for donor trust and frictionless contribution; designed volunteer portal to simplify sign-up and onboarding.
- Maintained a consistent visual identity and compassionate design language across all pages, reinforcing organizational brand and values.

Projects

AI voice chat and assistance, Scripting & Automation with Python, National Competition

- Developed an AI-powered voice chat assistant that enables real-time conversational interactions using natural language processing and speech recognition technology.

A school registration database, Database Management & SQL, Future Talent Academy

- Designed and built a relational database system to manage student registration, enrollment, grades, and attendance tracking using SQL.

Personal portfolio website, Web development with HTML, CSS & JavaScript

- Designed and developed a live personal portfolio website showcasing projects, skills, and experience with a clean UI built from scratch using HTML, CSS, and JavaScript.

Leadership

Independent Client Delivery Lead, Sole point of contact and end-to-end project owner on 4+ client engagements across Ethiopia and the US, managing timelines, stakeholder communication, and delivery.

Technology Advocate, Proactively introduced automation and AI tooling to clients who had no prior exposure, guiding adoption from zero through production deployment.

National Competition Participant, Represented Future Talent Academy at a national-level technology competition with an AI voice assistant project.

Skills and Interests

Automation & AI: n8n, Zapier, OpenAI API, Claude API, RPA scripting, LLM workflow integration

Programming: Python (scripting, automation, NLP), SQL, JavaScript, HTML, CSS

Web Development: Responsive front-end development, UI/UX design, Figma, mobile-first design

Integrations & ERP: QuickBooks, Google Sheets API, Microsoft Excel, REST APIs

Databases: Relational database design, SQL (DDL/DML), schema modeling, data normalization

Tools: Git, VS Code, Figma, cross-browser compatibility testing

Computer Languages: HTML, CSS, Javascript, Python, SQL, MS SQL, C++, C#
